Test information: EWG scientists purchased products in grocery stores in the San Francisco Bay area and Washington, DC, area. Either one or two different samples were purchased for testing, depending on the type of product. Approximately 300 grams of each product were packaged and shipped to Anresco Laboratories, in San Francisco, Calif. Glyphosate levels were analyzed by liquid chromatography tandem mass spectrometry method, with the limit of quantification of 10 ppb. Testing methodology is described at <http://food.anresco.com/new-era-of-glyphosate-testing-in-food-2/>
